Subject: EIA for Mooi River Mngeni River Transfer scheme Phase 2 (MMTS2)

Hi Elisabeth

As discussed to day please can you forward two copies of the EIA Report to me. I will forward one of them onto Roy Ryan at our Head Office for their input.

Some of the issues I would like to raise in the meantime are listed below:

1. No reference is made to DR 146 which is very close to the dam which I believe could be affected and I could not find it on your map.
2. What roads will be utilised for the hauling in of material for the construction of the dam wall.
3. Where will the additional accesses if any tie into our current road network.
4. The locality of any of your quarry / borrow pit sites.

Please can you send me information in regard to the above?

Roy Ryan – Please can you give me the correct file reference for this.

Roy the website for this dam is <http://www.mmts2.co.za/download.html> which contains extensive documentation.

If there are any further queries in regard to the matter please contact me.

Thanks

Blake Mackenzie
